

SAY 'YES'

and let the hospital
doctor or nurse see your
GP medical record.

If you need to go to A&E from **November 2017**, the doctor or nurse treating you may ask to see your GP medical record.

Saying '**YES**' and giving the clinical team permission to see your full medical history will help to protect your safety by allowing them to understand any health conditions or care plans you have.

You do have the right to say no to sharing your information.

Ask a member of practice staff for further information.
